**“PRUNUS - THE CHERRIES”**

A family of ornamental trees, very highly valued because of their leaf color and showy flowers, and a few bush form shrubs that also have special flower characteristics. They all require good soil drainage.

***Prunus cistena*, PURPLE LEAF SAND CHERRY (7-14' tall x 7-10' spread')**

Alternate, simple leaves are intense reddish-purple all summer long. Single, pinkish fragrant flowers emerge after leaves followed by small blackish fruit. This deciduous bush has a moderate growth rate with a rounded growth habit. Prefers sun and moist, well drained soils. Zones 2-8.

**VERY LIMITED SUPPLY, CHECK FOR CURRENT AVAILABILITY!**

***Prunus subhirtella pendula 'Plena Rosea'* DOUBLE PINK WEeping CHERRY**  
(25' tall x 25' spread)

Graceful form and an impressive spring floral display make this one of the best weeping trees. Contorted form is an unusual artistic expression of a classic ornamental tree. Dark green foliage in summer followed by yellow to bronze in autumn. Flowers are double, pink and very profuse. Requires full sun to partial shade. pH 6.0 to 7.5. Zone 5.

*Prunus x 'Snow Fountain'*(*Snofozam*), SNOW FOUNTAIN WEEPING CHERRY  
(6-12' tall x 6-12' spread)

A carefree maintenance tree requiring little or no maintenance to maintain its form and beauty. This small naturally weeping tree is absolutely stunning when covered in prolific white blooms, 5 petaled in spring. Makes a great specimen tree! Excellent for small residential landscapes with limited space areas. Lush green foliage of summer turns to lovely hues of orange, gold and red in autumn. Requires full sun to partial shade. pH 6.0 to 7.5. Withstands pruning very well. Heat, drought and disease tolerant. Zone 4.

Note: This tree does not become a tall tree. Lawn specimens rarely exceed 7' tall, they just grow wider and wider, no apical dominance. The Pink Flowering Cherries do get taller.

(SEE PICTURE ON NEXT PAGE)

*Prunus x 'Snow Fountain'*(Snofozam),  
SNOW FOUNTAIN WEeping CHERRY

*Prunus virginiana* 'Shubert', CANADA RED CHERRY (25' tall x 20' spread')

Also known as Common Chokeberry. It is a hardy pyramidal deciduous tree with foliage that emerges green but turns reddish purple with age. It has clusters of white flowers in the spring. The fruit are red at first but turn black with maturity. In the fall it turns orange and red. Fast growing, straight trunked tree. Annual growth of 12-18" per year. Zone 2.

Note: Very hardy, can tolerate sub-zero temperatures. We have observed them growing in Wawa, Ontario, Canada.
